

SUSFIN PR is a water base, low solvent, penetrating agent based on phosphate esters. Enables flexible and controlled penetration of leather finish.

Properties

Chemical Composition	:	Phosphated Esters
Appearance	:	Transparent slightly pale colour liquid
pH (10% Solution)	:	9.5 – 10.5
Charge	:	Anionic

Features

- SUSFIN PR enables user to create VOC free formulations for applications such as the surface impregnation of full or corrected grain side leathers, and the improvement of wetting and flow characteristics of basecoats. It allows better distribution of resin, improves anchorage, without altering the softness.
- SUSFIN PR is a strong penetrator which is compatible with most impregnating acrylics. By moderating its quantity in season, the user can achieve precise control on penetration of impregnation resin to achieve required grain tightness of leather. It can also be used as an auxiliary to improve penetration of stain coats.

Application

Mix first with water. If used in impregnation resin, use within 24 hours.

Impregnation	:	100	parts	Susfin PR
C/G		300	parts	Susfin Binder IP02
		600	parts	Water
Impregnation	:	125	parts	Susfin PR
Full Grain		200	parts	Susfin Binder IP01
		675	parts	Water

Storage / Shelf Life

If SUSFIN PR is stored under dry and cool conditions, the products does not show any problem and has a shelf life of 6 months.

Packaging

60 Kgs
